

Intern Mobile App Developer Assignment — Aviora Type App

Objective:

Build a basic airport/passenger assistance mobile app where passengers can submit travel assistance requests and airport/admin staff can track, manage, and update request status.

Assignment Scope

Passenger App Screens

1. Splash Screen
2. Login / Signup
3. Home Dashboard
4. Add Trip Details
5. Assistance Request Form
6. Upload Documents
7. Request Tracking Screen
8. Notifications Screen
9. Profile & Settings

Passenger Form Fields

Include:

- Passenger Name
- Mobile Number
- Email
- Airport Name
- Flight Number
- Travel Date & Time
- Departure / Arrival Type
- PNR Number
- Assistance Type
- Special Requirement Notes
- Upload ID / Ticket / Medical Document
- Current Location / Terminal

Assistance Types

- Wheelchair Assistance
- Senior Citizen Assistance

- Medical Assistance
- VIP / Protocol Assistance
- Baggage Assistance
- Lost & Found Help
- Airport Navigation Help
- Emergency Support

Admin / Staff App Screens

1. Staff Login
2. Request List
3. Request Detail
4. Assign Staff Screen
5. Status Update Screen
6. Passenger Communication Screen
7. Daily Report Screen

Request Status Flow

Use these statuses:

- New Request
- Under Review
- Staff Assigned
- Passenger Contacted
- Assistance In Progress
- Completed
- Cancelled

Technical Requirements

Intern can use:

- Flutter / React Native
- Firebase / Supabase / Mock API
- Basic authentication
- Image/document upload preview
- Push notification mock
- Clean folder structure

- Role-based screens: Passenger / Staff / Admin

Bonus Features

- QR code for request ID
- Live status timeline
- Airport map placeholder
- Staff assignment logic
- Search/filter requests
- Offline draft saving
- Dark/light mode

Submission Required

1. GitHub repository link
2. APK file or demo video
3. Screenshots of all screens
4. README file
5. Mock API/Firebase explanation
6. Estimated time taken

Evaluation Criteria

Criteria	Marks
UI/UX quality	20
Form validation	15
Code structure	15
Request workflow	20
Upload handling	10
Firebase/API integration	10
README/demo clarity	10

Total: 100 marks
